PROFESSIONAL SUMMARY

Full-stack software developer with over two years of professional experience designing and delivering scalable backend services and automation platforms. Proven track record shipping production systems built on Python, FastAPI, Node.js, and TypeScript, integrated with message queues, caching layers, and cloud infrastructure to meet demanding throughput and reliability requirements. Currently advancing expertise in AI-assisted development workflows and cloud-native architecture, with a consistent focus on clean code, maintainable design, and effective cross-functional collaboration.

PROFESSIONAL EXPERIENCE

Lead Developer | Geeks5g

Leading development teams and architecting scalable backend services. Responsible for technical decisions, code reviews, mentoring junior developers, and ensuring best practices across multiple concurrent client projects. Feb 2026 - Present

Full Stack Developer | Geeks5g

Built full-stack applications with React/Next.js on the frontend and FastAPI + PostgreSQL on the backend. Implemented async pipelines with Celery and Redis, integrated third-party services, and shipped automation workflows used in production. Jan 2025 - Feb 2026

Software Development Assistant | SENA

Supported senior developers in building and maintaining applications. Gained hands-on experience with agile methodologies, version control, and collaborative development practices in a structured team environment. May 2024 - Jan 2025

EDUCATION

Informatic Engineering — In progress

Ongoing

Technology in Information Systems Analysis & Development — SENA

2022 - 2024

TECHNICAL SKILLS

Backend:

Python FastAPI NestJS Node.js Express.js PHP Rust

Databases & Storage:

PostgreSQL MySQL MongoDB Redis SQLAlchemy AWS S3

Frontend:

React Next.js TypeScript JavaScript Tailwind CSS HTML5/CSS3

Async, Automation & Cloud:

Celery Kafka Selenium Playwright Docker AWS Google Cloud Vercel

WordPress & AI:

WordPress Custom Plugins OpenAI Integration AI-assisted Development

KEY PROJECTS

NextGen Taxman · Accounting Platform

Multi-tenant accounting SaaS handling invoicing, bill-pay, payroll, and bank reconciliation. Event-driven backend with async workers and a typed dashboard.

Tech: NestJS, Next.js 15, Kafka, PostgreSQL, Redis, AWS Cognito, TypeScript

SEO Ranking Heatmap System

Geographic ranking analysis processing dense keyword datasets, generating coordinate-based heatmaps and competitor visibility reports.

Tech: Python, FastAPI, PostgreSQL, Redis, Celery, NumPy, Pandas

Contract Signing API

Enterprise contract signing service with AWS S3 storage, cryptographic signature flow, and legally compliant document trails.

Tech: Python, FastAPI, AWS S3, PostgreSQL, JWT

Lead Scraper Service

Distributed crawler for Google My Business across worldwide locations, with proxy rotation, queueing, and normalized lead records.

Tech: Python, FastAPI, Selenium, PostgreSQL, Redis, Celery

Page City Matrix Plugin

WordPress plugin that generates SEO-optimized location pages for each selected city, paired with a FastAPI content service.

Tech: PHP, WordPress, MySQL, Python, FastAPI, React

LANGUAGES & SOFT SKILLS

Languages: Spanish (Native), English (B2)

Professional Skills: Problem Solving, Team Collaboration, Technical Documentation, Code Review, Agile Methodologies
